Dear Colleagues,

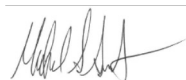

It gives me great pleasure to welcome you to our vibrant Northeastern community. Our mission at the Center for Advancing Teaching and Learning Through Research (CATLR) is to help you design, integrate, and research learning across experiences. We are dedicated to inspiring, equipping, and connecting educators like you across the global University network. All of us are looking forward to meeting you and learning about your interests!

We will convene on **Monday, August 17, 2026** within Zoom (meeting link: <https://northeastern.zoom.us/j/93220872865>). The day will include faculty and student panel conversations, interactive breakout sessions, and more. We will consider Northeastern's signature approaches, experiential and global learning, and together we will explore strategies for engaging with generative AI in teaching and learning.

You don't need to wait until Orientation to connect with us. We are available over the summer, should you wish to get a head start on preparing for the academic year. We offer the following:

- One-on-one confidential consultations (email or virtual). This includes support as you develop new courses, revise existing courses, and/or transition courses that you have previously taught into new learning environments (e.g., hybrid, online, flipped). Contact us at catlr@northeastern.edu to schedule a consultation.
- A wide range of programs, including workshops and self-paced modules, to enhance your teaching practice. You can learn more about our programming at <http://learning.northeastern.edu/events>.

If you have any questions about teaching and learning at Northeastern before the year begins, please contact us at catlr@northeastern.edu. In the meantime, I invite you to explore [our website](#) to learn more about CATLR.

Michael Sweet, Ph.D., Director
