Fellowship Opportunities

Fellowship Opportunities

The New England Future Faculty Workshop Planning Committee has compiled a list of fellowship opportunities for Ph.D. students and postdoctoral scholars interested in more training or research opportunities prior to embarking on a faculty job search. This list is not meant to be exhaustive.

ADVANCE Office of Faculty Development's Future Faculty Fellowship

The ADVANCE Office of Faculty Development invites applications from candidates in all disciplines represented at Northeastern University to apply for the Future Faculty Fellowship Program. Northeastern University's mission emphasizes translational research that addresses global challenges and enhances social well-being. Fellows are appointed for one academic year and receive support from a mentor, access to an office and lab space (if applicable), \$5,000 in professional development funds, and a salary of \$60,000. Applications will open in November 1, 2022 and close January 23, 2023 for the 2023-2024 academic year.

American Association for the Advancement of Science (AAAS)'s Science & Technology Policy Fellowships

Fellows select assignments in congressional offices or federal agencies. This is a year-long opportunity, beginning September 1 and ending August 31. AAAS seeks candidates from a broad array of backgrounds and a diversity of geographic, disciplinary, gender, and ethnic perspectives, as well as disability status. Fellows have ranged in age from late 20s to early 70s. They represent a spectrum of career stages, from recent Ph.D. graduates to faculty on sabbatical to retired scientists and engineers. There is also a stipend of \$83,000 - \$115,000.

Fellowship Opportunities

Food and Drug Administration Office of Business Informatics Innovation Fellowship

The Center for Drug Evaluation and Research (CDER) in the U.S. Food and Drug Administration (FDA) Office of Business Informatics (OBI) is looking for experienced IT professionals and business informatics specialists with strong communication and decision-making skills for the Office of Business Informatics Innovation Fellowship Program. The position requires that fellows perform work of an exceptional degree of difficulty across a wide range of topics at the convergence of technology, process, policy, and delivery. The incumbent leverages their experience, deploying high-quality, enterprise-wide platforms and services to lead major initiatives; consults on systems and policy proposals; and provides technical, policy, and programmatic guidance to the government.

Ford Foundation Postdoctoral Fellowships

Postdoctoral fellowships will be awarded in a national competition administered by the National Academies of Sciences, Engineering, and Medicine (NAEM) on behalf of the Ford Foundation. The awards will be made to individuals who, in the judgment of the review panels, have demonstrated superior academic achievement, are committed to a career in teaching and research at the college or university level in the U.S., show promise of future achievement as scholars and teachers, and are well prepared to use diversity as a resource for enriching the education of all students. Applicants must have completed a Ph.D. or Sc.D. Awardees will receive a one-year stipend of \$50,000.

INVEST

The College of Science at Northeastern University invites applications for multiple, cross-disciplinary tenure-track faculty positions at the rank of Assistant Professor, beginning academic years 2022-23 or 2023-24. These positions are part of the new College INVEST initiative to hire brilliant and diverse faculty across all demographics of society. Candidates who are completing their Ph.D. or at an early stage of their postdoctoral training are encouraged to apply to these innovative tenure-track faculty appointments.

Fellowship Opportunities

Kluge Fellowship

The Library of Congress invites qualified scholars to conduct research in the John W. Kluge Center using the Library of Congress collections and resources for a period of up to eleven months. Scholars who have received a terminal advance degree within the past seven years in the humanities, social sciences, or in a professional field, such as architecture or law that are eligible to apply. Fellows receive a stipend of \$5,000.

National Endowment for the Humanities (NEH) Fellowship

NEH Fellowships are competitive awards granted to individual scholars pursuing projects that embody exceptional research, rigorous analysis, and clear writing. Applications must clearly articulate a project's value to humanities scholars, general audiences, or both. Fellowships provide recipients time to conduct research or to produce books, monographs, peer-reviewed articles, e-books, digital materials, translations with annotations or a critical apparatus, or critical editions resulting from previous research. Projects may be at any stage of development. The NEH invites research applications from scholars in all disciplines, and it encourages submissions from scholars and junior scholars. Maximum award of \$60,000.

Oak Ridge Institute of Science and Education (ORISE) Department of Defense Fellowship Program

To ensure the robust supply of scientists and engineers to meet the U.S. Department of Defense (DoD)'s future science and technology needs, the ORISE program places individuals from the academic community (students, recent graduates, and faculty) in DoD research projects. The ORISE Research Participation Programs accept applications from students, recent graduates, and faculty researchers year-round. Research appointments can vary from three months to one year and may be renewed for additional appointment terms. The program provides a salary, training, and travel allowances.

Fellowship Opportunities

OnRamp Fellowship

A re-entry platform that matches experienced women returning to the workforce after a career break with law firms, legal departments, and financial services firms in the U.S., Australia, and the UK for six to twelve-month paid positions. This unique experiential learning program gives returning women—many of whom opted out of the workforce for a period of time to raise children—an opportunity to demonstrate their value in the marketplace while also increasing their experience, skills, and contacts. There is also an annual stipend \$110,000 - \$205,000 depending on the size of the organization and benefits.

Racial Equity in Science, Technology, Engineering, and Mathematics (STEM) Education

The National Science Foundation (NSF) Directorate for Education and Human Resources (EHR) seeks to support bold, ground-breaking, and potentially transformative projects addressing systemic racism in STEM. Proposals should advance racial equity in STEM education and workforce development through research (both fundamental and applied) and practice.

Robert Rose Education Award in Hydrogen and Fuel Cell Technology

The Rose Award provides for an academic year residency focusing on hydrogen safety and fuel cell technologies at Pacific Northwest National Laboratory in Richland, Washington. Awardees will receive a stipend of \$25,000 to \$35,000 for full program, health insurance, round-trip travel to Washington, D.C. for a three-week orientation seminar conducted in cooperation with the U.S. Department of Energy and following travel to Richland. Awardees will also receive a professional development subsidy for attendance at one professional conference. Open to current or recent graduate students at the Masters, Doctoral, or Postdoctoral level in relevant STEM fields.

Fellowship Opportunities

U.S. Geological Society (USGS)'s Mendenhall Research Fellowship Program

The mission of the USGS is to provide reliable scientific information to (1) describe and understand the Earth; (2) minimize loss of life and property from natural disasters; (3) manage water, biological, energy, and mineral resources; and (4) enhance and protect our quality of life. The USGS invites postdoctoral scholars to conduct concentrated research in association with selected members of the USGS professional staff. Fellows will have two-year appointments to the USGS, receiving a full salary and benefits at the GS-12 level. Applicants must have their Ph.D. degree no earlier than five years before the application opening date, and prepare a proposal in addition to other application materials. Each research opportunity has a different application, please double check on the webpage to confirm.

Job Search Resources

Job Search Resources

The New England Future Faculty Workshop Planning Committee has compiled a list of free websites that can assist in the faculty job search, regardless of discipline. Some sites may produce repetitive results; however, some institutions are limited to posting on specific sites or have increased targeted recruitment. Therefore, checking multiple sites can be helpful. Always check your disciplinary job sites first.
